

PRINCE PATEL

React JS Developer | Android App Developer | MSc IT Student
Kadi, Gujarat, India • +91 88668 60399 • prince008393@gmail.com

PROFESSIONAL SUMMARY

Motivated MSc IT student and BCA graduate with hands-on internship experience in React JS development and a strong track record of independently designing and shipping full-stack web and Android applications. Skilled in integrating REST APIs, cloud databases (Firebase, MySQL), cryptographic security, and AI services (Google Gemini API) into production-quality mobile and web products. Proven ability across frontend development, Android development, database design, and data-driven, user-centric problem solving.

CORE SKILLS

Languages & Frameworks — JavaScript (ES6+), React JS, HTML5, CSS3, Bootstrap, PHP, SQL

Mobile Development — Android App Development, Firebase Firestore, Firebase Authentication, Room Database (offline storage)

APIs, Security & Integrations — REST APIs, Google Gemini API (AI), Google Maps API, Cryptography (AES Encryption/Decryption), Password-Based Key Derivation, PDF/Excel (.xlsx) Export

Databases — MySQL, SQL, Firebase Firestore

Tools & Other — Power BI, Data Analytics, Git, UI/UX Fundamentals, Problem Solving, Team Collaboration

EXPERIENCE

React JS Intern — Praxware Technologies Internship

- Developed and maintained React JS components for a production restaurant website, including an advance table-booking feature built with React JS and Bootstrap.
- Collaborated with the development team on UI/UX improvements and feature enhancements for live web applications.
- Implemented state management, props, and component lifecycle logic to build reusable, maintainable front-end components.
- Gained hands-on experience with real-world front-end workflows, including version control and code review.

PROJECTS

AaiTravo — AI-Powered Travel Planning App (Android)

- Built an AI-driven trip-planning app using the Google Gemini API to auto-generate day-by-day itineraries; users review/adjust plans with integrated location details, photos, budget tracking, packing/task checklists, live weather, and notes.

SafeCipher — Secure Text Encryption & Decryption App (Android)

- Built an Android app to encrypt and decrypt text messages using a password-based cryptographic engine; implemented AES encryption with password-derived keys (PBKDF2) and salted/IV-based encoding so only the correct password can recover the original message, keeping shared text private and tamper-resistant.

MediTime — AI-Assisted Medication Reminder App (Android)

- Built a medication reminder app that notifies patients on schedule and logs adherence; integrated Gemini API for schedule assistance and dosage queries, with a fully functional offline mode and an accessible interface.

SmartExpenseManager — Personal Finance App (Android)

- Developed a finance app with real-time sync via Firebase Firestore and secure Firebase Authentication; built an income/expense dashboard with categorisation and filters, plus PDF/Excel (.xlsx) export.

TripSplitter — Offline Group Expense Splitter (Android)

- Built a fully offline app backed by a local Room database to split trip expenses among groups; tracks who owes whom and shares trip summaries via the Android share intent (WhatsApp, email, etc.).

NearbyReminders — Location-Based Reminder App (Android)

- Developed an app integrated with the Google Maps API to trigger location-based reminder notifications automatically, without manual check-ins.

Library Management System — Software Project

- Built a full-featured SQL system for book inventory, member records, and issue/return tracking, with search, filter, and CRUD operations and an intuitive interface.

Student Result Management System — Software Project

- Developed a PHP/MySQL system with student, teacher, and admin portals for managing academic results, online result viewing/printing, and subject-wise progress tracking.

EDUCATION

Master of Science in Information Technology (MSc IT) — In Progress

Gandhinagar University, Gandhinagar, Gujarat, India

Bachelor of Computer Applications (BCA) — Completed

Kadi, Gujarat, India
